

**REMARKS**

The Sequence Listing submitted herewith was originally prepared and filed with the International Searching Authority (ISA) in conjunction with priority 371 application PCT/US2005/010195. While formatting the Sequence Listing it was noted that SEQ ID NO:10 listed the nucleic acid sequence associated with Genbank Accession No. XM\_341509 and not the deduced amino acid sequence. SEQ ID NO:9 recited the deduced amino acid sequence associated with XM\_341509. In an effort to reduce confusion and bring the Sequence Listing into concordance with the specification, SEQ ID Nos. 9 and 10, as originally submitted to the ISA, have merely been switched with one another in the attached sequence listing text file. SEQ ID NO:10 now recites the deduced amino acid sequence associated with XM\_341509 and SEQ ID NO:9 recites the nucleic acid sequence associated with XM\_341509. SEQ ID Nos. 9 and 10, along with all other sequences provided in the attached text copy of the Sequence Listing, include no new matter that goes beyond the original application as filed.

Additionally, applicants have amended the application, merely inserting sequence identifiers and the paragraph that incorporates the text copy of the Sequence Listing, as filed electronically via EFS-Web. Applicants respectfully submit that the above-identified application is now in compliance with 37 C.F.R. §§ 1.821-1.825 and WIPO Standard 25.

Respectfully submitted,  
SEED Intellectual Property Law Group PLLC
